

## Zuari Rain Forest - Update – October 2020

Dear Patrons,

Greetings from Zuari,

As we all are going through the tough times and challenges thrown out by the pandemic, the concern regarding safety is a significant one. The fear of interacting with other human beings has made things tough for businesses like ours.

Even then, we are following strict hygiene norms to ensure the development works are not hampered and committed to complete the project and handover.

Though, we were not able to get the required numbers of work force at site as migrant labours are reluctant to return due to Covid-19 Phobia and also lack of transport from their respective native places added to the concern of the workers but we were successful in getting few of the skilled work force required on immediate basis, so that our site works are not affected.

On behalf of all of us at ZRF, we assure you that we are committed to deliver the project.

As we go forward, we will keep you updated on the project progress.

Please take care of yourselves and look out for one another.

Stay safe,
